## CAREER OBJECTIVE

Detail-oriented Computer Science Engineering student specializing in IoT with strong technical and analytical skills. Experienced in full-stack web development, machine learning, and IoT implementations. Seeking a challenging role to apply programming expertise and problem-solving abilities in a dynamic organization.

---

## EDUCATION

### High School Education

Kendriya Vidyalaya Vallabh Vidyanagar (CBSE)

2010-2022

### Bachelor of Engineering in Computer Science Engineering - IoT

G H Patel College of Engineering & Technology

2022 - 2026 (Expected)

**Relevant Coursework:** Web Development, Data Structures & Algorithms, Database Management Systems, Machine Learning & AI, IoT & Embedded Systems, Computer Networks

---

## TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, C
- **Web Development:** AngularJS, HTML/CSS, Django, Flask, JavaScript, ReactJS, NodeJS
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Machine Learning & Data Science:** Pandas, NumPy, Scikit-learn, TensorFlow, Seaborn, Keras, OpenCV
- **IoT & Embedded Systems:** ESP32, WeMos, Arduino, Raspberry Pi, ESP8266
- **Version Control & Tools:** Git, GitHub, Railway Deployment, Blender, Render

---

## PROJECTS

### 1. Learnova — AI-powered Adaptive Learning Platform (Odoo Hackathon)

- Developed an intelligent, personalized education platform that adapts to individual learning needs, challenging the traditional one-size-fits-all approach
- Implemented dynamic test generation using OpenAI API based on user strengths and weaknesses
- Ensured academic integrity with real-time eye-tracking (OpenCV) and tab-switch detection to monitor focus during tests

### 2. Music Recommendation & Analysis System using Spotify API

- Developed a full-stack web application that generates personalized music recommendations based on user preferences
- Created features for personality analysis based on playlists and lyrics-to-song matching functionality
- Built using Python, Flask, and deployed on Railway platform

### 3. IoT-Based Facial Recognition Attendance System

- Engineered an automated attendance tracking system using ESP-32 CAM for image capture and facial recognition
- Developed a Django-based web interface to display real-time daily and subject-wise attendance records
- Implemented data storage in CSV format for efficient access and management

---

## EXPERIENCE

**Summer internship at Tatvasoft** Developed a full-stack community engagement platform using Angular for frontend with .NET backend and PostgreSQL database.

---

## ACHIEVEMENTS

Selected in the **top 50 teams** out of 1200 from across India in the **Odoo x Mindbend Hackathon '25 at SVNIT** Surat

---

## CERTIFICATIONS

- [Python for Data Science, AI & Development by IBM](#)
- [Data Visualization with Python by IBM](#)

---

## ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Bengali, Gujarati
- **Soft Skills:** Problem-Solving, Critical Thinking, Team Collaboration, Leadership, Communication
- **Extracurricular Activities:** Volunteering in Animal Saving NGOs
- **Hobbies:** Chess, Football, Poetry Writing, Digital Art, Video Games
